I understand that during boarding, illnesses may occur which necessitate medical treatment. I expect the doctors and staff at South Ocala Animal Clinic to use reasonable judgment, and authorize the doctor to examine and treat my pet(s) as needed at my expense, which includes treatment for internal parasites, fleas, and ticks. For safety, pets admitted must be current on vaccinations and have had a negative fecal test within the past six months. A professional exam is required for all pets not seen by our doctor(s) within the past 12 months.
